very cool game, but if you add the rocket customization, it will be very cool!. is alright mang.. A casual rocket science. A game like Old Lunar lander game, with more casual and simple but fun graphic. Quite challenging, but not too punishing. See gameplay in 5 minutes.

Simple at first, gradually the levels introduce new hazards to avoid and become more challenging to navigate. It reminds me somewhat of a game from 1986 called "Thrust", except you don't have to escape the level trying to carry a cumbersome payload. Pleased for the Linux support and happy to say I've had no issues playing it with my Xbox ONE controller.
