What can I really say about this? It's mayhem on the court and combines so many sports in the most crazy ways it can. Best part is, it all works together really really well! Amazing if you wanna play with friends. This game is awful but kinda fun with friends. Good times. I recommend.. Bejeweled is a classic game that never stops making you come back for more. Each Bejeweled is practically the same and delivers the same amount of fun in each. The goal of the game is to switch around a certain amount of jewels to put together a series of 3 or more in a line to make that line or set disappear. The graphics are perfect for the game. The sounds in the game can feel repetitive at times. The overall gameplay of the game is awesome and really burns some time for when you have time to spare. There are endless stages it feels like. Each level of the bejeweled series has its own tricks and treats for you to enjoy. I highly recommend playing these and getting any of these great Bejeweled games when you have a chance. I love playing them and these are highly recommended for anyone working in the office or at home. I love this series and i know you will too!! This game is like Faerie Solitaire, but not as much fun. It is also unfair with difficulty.

You always have to use consumables in later stages to win.

I would recommend it if you like the game type.. A good game but a bit hard.... plenty of spooks to be had. Not a bad game, yeah it's really buggy and wonky, but i legitimately got some enjoyment out of this game because of how dumb it was at some points. The only part that i didn't like was the jumping, the damn jumping. The combat is fairly easy and the bosses aren't hard, but still fun. Best game of 2020, game of the year contender.

One of the biggest fans of Myth. I spent years of my life playing it. I've played thousands of single-player games and this is the only multiplayer game I enjoy. There is no better multiplayer game. It's also pretty much impossible to ever make this for consoles so don't wait for a port. I play 99% of my games on a console but this one can only work on PC due to the many buttons and fast clicks needed to move the camera and select and move units.

Deadhold revives Myth and any fan should enjoy it. It adds a few new things and some changes, like health potions instead of Journeyman. New stuff is dropped items and spells you can use, including a Resurrect option for dead units. But most of it is the same Myth you knew and loved. If you never played Myth I have no idea how to recommend or explain this game to you. It's like an RTS but with no buildings or unit-making or resources. You choose your units at the beginning of the match and then micromanage till the end. That's what makes the multiplayer so fun is that you can work as a team with different units, or micromanage against others. Combine that with the physics/gibs and you can never not have a good time. Right now, on day one of Early Access, this is already a solid "good". It has the potential to be the greatest game ever made. We'll see. gla. Don't buy these packs. They aren't worth it, you can't even see yourself in the skin first of all, and second, the car's skin won't really matter since you won't even give a

Base game overall rating: 9.6/10. It's like Tetris mixed with shuffleboard. Not precise like Tetris you also have to aim. It's a pretty fun quick pick up and play game.

. Do not buy, it's a cheat.. I will make this review relatively brief and try to simplify down to core information:

Why would you want this program?

If you are planning to make flashcards for educational purposes, reference materials for game rules, or even designing tokens or other props, CardCreator is one of the best programs on the market. It is decidedly more streamlined than the Adobe Suite and has a relatively low learning curve. In addition, a significantly smaller price point than any program in Adobe makes it far more readily accessed to those of more modest means who have less drastic aspirations for their cards.

What would dissuade you from buying this program?

If you are looking to build a complex, art-rich trading card game, this is not the program for it. The professional trading card scene uses templates and designs built using adobe and other high-end programs, which better allow for custom backgrounds and art use. This program has no realistic means of competing with adobe on that front, as the learning curve in adobe is slight enough that when you reach that level of complexity, it is easier to use the more expensive editing suite than CardCreator.

Hope this helps someone out there.
